Hello Awase,

26-02904

Title: Data Engineer
No. of positions: Multiple opening

If you or anyone who you know might be interested, in the role listed, please call or email an updated word copy of resume.

Location: 22 Adelaide St. W. Suite 2720, **Toronto, ON M5H 4E3 (3 days/week)**
Position Type: Contract to Hire, with transition to FTE happening at the **12 month mark**

MUST HAVE: (Resumes that do not explicitly indicate the experience listed below will not be considered)

1. 5+ years of experience in data engineering, with a proven track record of designing and implementing scalable, high-performance data systems.
2. Significant experience in leading small teams of Data Engineers and fostering their professional growth.
3. Demonstrated ability to collaborate with cross-functional teams and communicate technical solutions effectively.
4. Proficiency in SQL, Python, or other relevant programming languages.
5. Strong understanding of data warehousing concepts and cloud-based data platforms (e.g., AWS, Azure, GCP).
6. Expertise in designing and implementing ETL processes, data modelling, and database management.
7. Familiarity with big data technologies (e.g., Hadoop, Spark, Kafka) and data integration tools.
8. Excellent problem-solving, critical thinking, and analytical skills.
9. Ability to travel to other offices or client locations as needed.
10. Strong communication skills
11. Fluency in English
12. Client-first mentality
13. Intense work ethic
14. Collaborative spirit and problem-solving approach
15. Education: A bachelor's or master's degree in computer science, Data Science, or a related technical field.

Overview: The Data Engineering Lead is a senior technical professional responsible for designing, building, and optimizing scalable data architectures and processes to enable efficient data utilization and data-driven decision-making. This role combines deep technical expertise with strong leadership skills to drive best-in-class data engineering solutions and mentor junior team members.

Responsibilities Data Architecture and Engineering:

- Oversee the design and implementation of robust, scalable, and reliable data systems, ensuring high performance and alignment with business goals.
- Collaborate with cross-functional teams to understand data requirements and translate them into effective data architecture and engineering solutions.
- Develop and manage software processes that facilitate seamless data movement between data warehouses, data lakes, and other internal systems.
- Design and optimize ETL (Extract, Transform, Load) pipelines to prepare high-quality data for various stakeholders.
- Design and build Data Ingestion frameworks, data quality frameworks and an integrated audit system.

Data Quality and Governance:

- Implement data quality assurance processes to identify and resolve data inconsistencies and issues.
- Establish data governance practices to maintain data accuracy, integrity, and security.
- Analyze data to derive meaningful insights that support data-driven decision-making.
- Communicate findings and recommendations to stakeholders effectively.

Technical Leadership and Mentorship:

- Serve as a technical authority in data engineering, staying updated on industry trends and best practices.
- Provide guidance and mentorship to junior Data Engineers, fostering their professional development.
- Facilitate knowledge sharing, collaboration, and continuous improvement within the team.

Thanks so much for your time, Awase, I look forward to talking soon!

Best Regards,

Deepika Verma, Talent Advocate
