Dear Awase,

Greetings..!!

Hope you are doing well.

I have a position for you given below. Please advise your interest in exploring this opportunity and share your updated resume

Job Title : Enterprise Architect Azure

Duration : Full Time

Location : Any US location

Job Description

We are looking for an Enterprise Architect Azure with deep hands-on experience in designing and implementing scalable, secure, and high-performance cloud solutions on Azure cloud.

The ideal candidate will have deep expertise in cloud architecture, infrastructure as code, AI, DevOps practices, and cloud security. This role requires a strong background in Azure cloud services, data engineering, and AI/ML solution architecture. You will lead the design and deployment of cloud solutions collaborating with cross-functional teams to drive innovation and digital transformation.

Key Responsibilities:

- Design and implement end-to-end Azure cloud solutions for enterprise-scale applications.
- Lead cloud architecture discussions and provide technical guidance to development and infrastructure teams.
- Develop and maintain architecture diagrams, documentation, and best practices.
- Ensure security, scalability, and performance of Azure-based solutions.
- Migrate on-premises workloads to Azure using tools like Azure Migrate, ASR, and others.
- Implement CI/CD pipelines using Azure DevOps or GitHub Actions.
- Optimize cloud costs and monitor resource utilization.
- Hands on experience on Open AI and Power Apps will be a plus.
- Stay updated with Azure services and recommend improvements or new technologies.
- Conduct architecture reviews and provide recommendations for improvements.
- Mentor junior architects and engineers.

Qualifications:

- 13+ years of IT experience with at least 10+ years in Azure cloud architecture.
- Strong hands-on experience with Azure IaaS, PaaS, and SaaS offerings.
- Expertise in Azure networking, security, identity, and governance.
- Proficiency in scripting (PowerShell, CLI) and Infrastructure as Code (ARM, Bicep, Terraform).
- Experience with containerization (AKS, Docker) and microservices architecture.
- Familiarity with Azure Monitor, Log Analytics, and Application Insights.
- Strong understanding of DevOps practices and tools.

- Excellent communication and stakeholder management skills.
- Azure certifications (e.g., AZ-305, AZ-104, AZ-400) are highly desirable

Please advise your interest in exploring this opportunity.

Thanks & Regards

Rahul Kumar
